

Nurture UK and The 6 Principles of Nurture

One of our school priorities is to enhance our whole school nurture provision through the Nurture UK accreditation process.

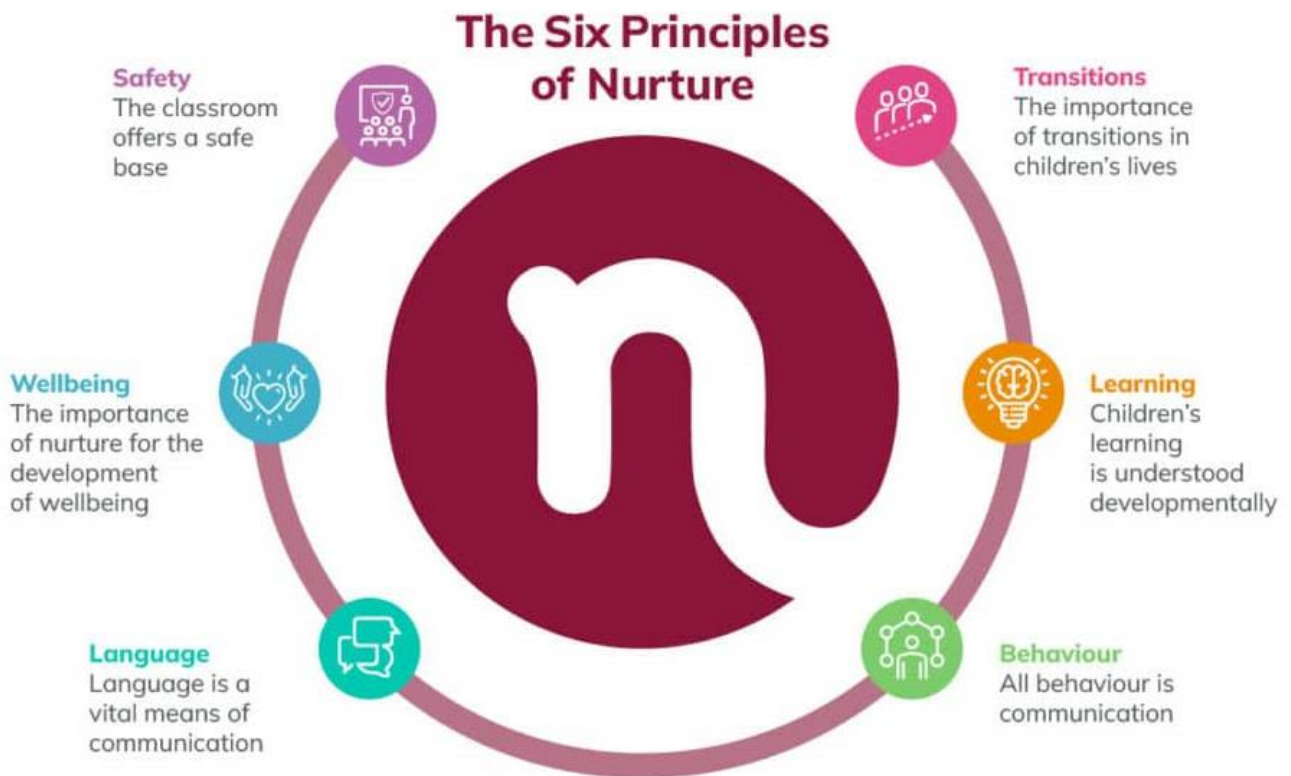

Nurture UK are an organisation dedicated to improving the social, emotional, mental health and wellbeing of children and young people.

The 6 Principles of Nurture are a set of values that we follow at school to make sure that all staff focus on the social and emotional needs and development of children and young people, ensuring all pupils are ready to learn.

The 6 Principles of Nurture that we follow are:

1. Children's learning is understood developmentally
2. The classroom offers a safe base
3. The importance of nurture for the development of wellbeing
4. Language is a vital means of communication
5. All behaviour is communication
6. The importance of transitions in children's lives

The 6 Principles of Nurture will be fully embedded in our school ethos, classes and shared learning environments and all staff are fully trained in The 6 Principles of Nurture and what that means for our school.

Authors: Eva Holmes and Eve Boyd

At Hadow Primary School, we ask that our parents and carers are partners with us in their child's social, emotional, behavioural and/or mental health journey and we all work together consistently to support our young people throughout their time with us.
