Term 3

TALK TIME
Talk about water from a science point of view. For example, how does water change when heated or cooled? Perhaps talk about rain, snow and ice.

CREATIVE
Create something showing your favourite fairy tale. A collage, a model, a painting, you choose.

PRACTICE MAKES PERFECT
Complete the doubles and halves worksheet. See how many doubles you can learn by heart.
 $1+1=2$
 $2+2=4$
 $3+3=6$

CREATIVE
Can you make a halves and quarters picture/design? Maybe cut shapes into halves and quarters and make patterns or play with numbers to make a pattern!

TALK TIME
Play snakes and ladders together. Use the sheet in your book, if you don't have this game at home.

PRACTICE MAKES PERFECT
Counting back from 100. See if you can start from any given number. You can log on to mathletics as well! (Your logon details are stuck into your diaries.)
