

TALK TIME

Watch and discuss 1 Growth Mindset video **each week** with an adult (there is a blue arrow to the right of the videos which has pre-made questions):

<https://ideas.classdojo.com/b/growth-mindset>

Write a thoughtful reflection on what was discussed into your home learning books.

CREATIVE

Write a new chapter for the fabulous book Artemis Fowl. You must include: figurative language, show/not tell language, rich descriptions and a problem/resolution plot and S.A.D structure.

PRACTICE MAKES PERFECT

Design an educational Maths poster that will teach someone about Angles, Shape, or another focus area from this term in Maths.
Our topic is Geometry.

Maple Class Term 5

PRACTICE MAKES PERFECT

For every Mathletics task you PASS (and LEXIA), you will receive 1 Dojo Point. Please write down the names of the lessons for us to check. If you need your login details, please get them from class.

CREATIVE

Have a look through a book with colourful pictures. Choose a picture and recreate it using pointillism. (No finger painting, no brush painting, etc). The size of this picture needs to be about the size of an index card, so find a small picture or shrink it down.

TALK TIME/ SHOW AND TELL

Watch this video with an adult: <https://vimeo.com/11083824>. Then, sit down together and design your own "Pay it Forward" idea. This term, you are going to be testing it out on your classmates, but it is important NOT to tell them your plan. At the end of the term, reflect on how successful it was and why.
What did you notice? What went well/poorly? Why do you think so?
